

2021

Digital Implantology WORKSHOP

Oneguide Course

This course is designed for clinicians who would like to incorporate a digital planning and guided surgery into their scope of implant dentistry. It is most suited for those who are already placing low to medium volume of dental implants. The course involves both theoretical and hands-on experiences.

Theory

- Restorative and surgical planning (3D implant positioning)
- Pros and cons of Free-hand vs Guided surgery
- Guided surgery system (Oneguide system, Osstem)
- Surgeon's standpoint
- Lab technician's standpoint

Hands-on

- Planning with 3 Shape software (implant studio, dental desktop)
- Guided surgery on models (Oneguide system, Osstem)
- Suturing techniques
